

# Bringing Together AIXM & WXXM

May 4-6, 2010

## AIXM/WXXM Conference | 2010

Navin Vembar

Federal Aviation Administration

AIM Enterprise Architect

# The AIXM/WXXM TIM

- Conducted AIXM & WXXM Technical Interchange
- Focus on the goal of digital confluence of weather and aeronautical information

# Schema Generation

- Both groups adopting the same tools (FullMoon) for schema generation
- AIXM group will adopt lessons learned from the WXXM group as we make the transition

# Connections between Schema

- Need to provide a general methodology for linking between schema
  - Cannot require inclusion of complete schemas
- Will produce a white paper with proposal for implementing links

# Other Issues

- Examining the use of ISO 80000 compliant units of measure in both models
- Developing future concepts for OGC Testbeds

# The Future

- We see significant need to develop cross-domain solutions for information exchange
- As NextGen and SESAR move forward, we will revisit this short-term approach
