

Global Harmonization Through Collaboration

Meteorological Information Exchange Model; update

Presented By: ***Dennis HART***
dennis.hart@eurocontrol.int

Date: ***August 28th, 2012***

**Federal Aviation
Administration**

AIR TRANSPORTATION INFORMATION EXCHANGE CONFERENCE - (FEATURING AIXM, WXXM AND FIXM)

August 28, 2012 - August 31, 2012
NOAA Auditorium and Science Center
Silver Spring, Maryland

Expectation from last year

Air Transportation Information
Exchange Conference - (featuring
AIXM, WXXM and FIXM)

Weather Information Exchange Model Version 2.0

- A MET Information Exchange Model suite
 - Fully aligned between FAA and EUROCONTROL
 - Fully aligned in and between NextGen and SESAR
 - Fully aligned between US and Europe

Federal Aviation
Administration

What you will get

- A MET Information Exchange Model suite
 - Fully aligned between FAA and EUROCONTROL
 - Fully aligned in and between NextGen and SESAR
 - Fully aligned between US and Europe

&

- Fully aligned with ICAO
- Fully aligned with WMO
- Fully aligned with OGC

Federal Aviation
Administration

Development philosophy

Air Transportation Information
Exchange Conference - (featuring
AIXM, WXXM and FIXM)

- Since 2009 for the “US and Europe” developments
 - Not too frequent updates
 - Incremental stepping of developments, no 'big bang'
 - Open/transparent decision making
 - Extension mechanism for regional/national difference
 - SESAR: Adherence to an ATM Information Reference: AIRM

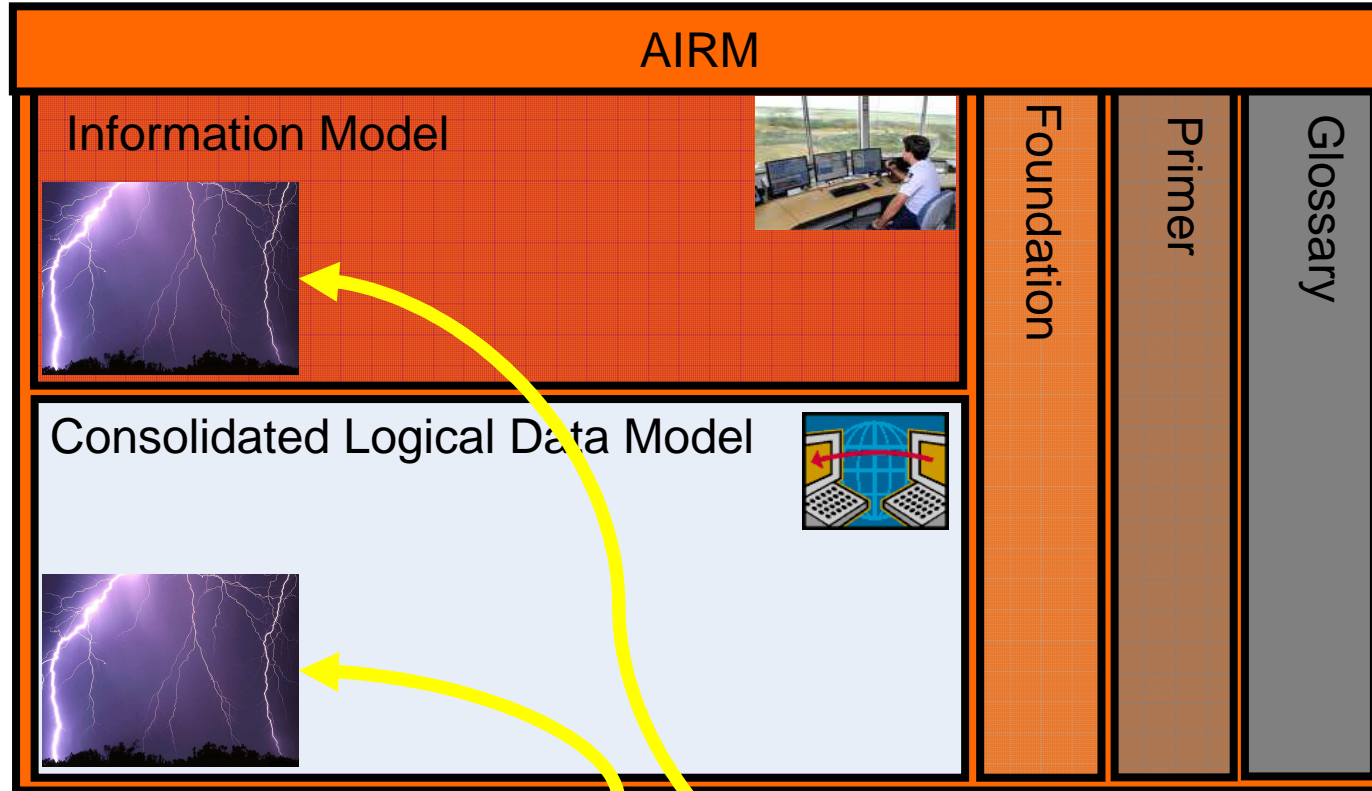

Federal Aviation
Administration

SESAR AIRM

Air Transportation Information Exchange Conference - (featuring AIXM, WXXM and FIXM)

Federal Aviation Administration

What we achieved till now

Air Transportation Information
Exchange Conference - (featuring
AIXM, WXXM and FIXM)

- Understanding with WMO and ICAO on roles, responsibilities and scope for a global framework for MET information exchange
 - User requirements for MET could differ around the globe
 - MET information capabilities could differ around the globe
- Clear agreement on development and release planning
- Focused support of FAA/EUROCONTROL on ICAO and WMO developments

The High Level Deal at UN level

Federal Aviation
Administration

Development philosophy

Air Transportation Information
Exchange Conference - (featuring
AIXM, WXXM and FIXM)

- Applying the same principles on a global level
 - Open
 - Phasing
 - Inclusive
 - Flexibility

The essence

Air Transportation Information
Exchange Conference - (featuring
AIXM, WXXM and FIXM)

- Till now:
 - WXXM covered the full spectrum of aeronautical meteorological information exchange based on an ISO/OGC/W3C foundation

METAR

Wind & temp data

Forecasts

Observations

TAF

Trend

Volcanic Ash Information

Convective Weather info

Warnings

SIGMET

And more...

Federal Aviation
Administration

The essence

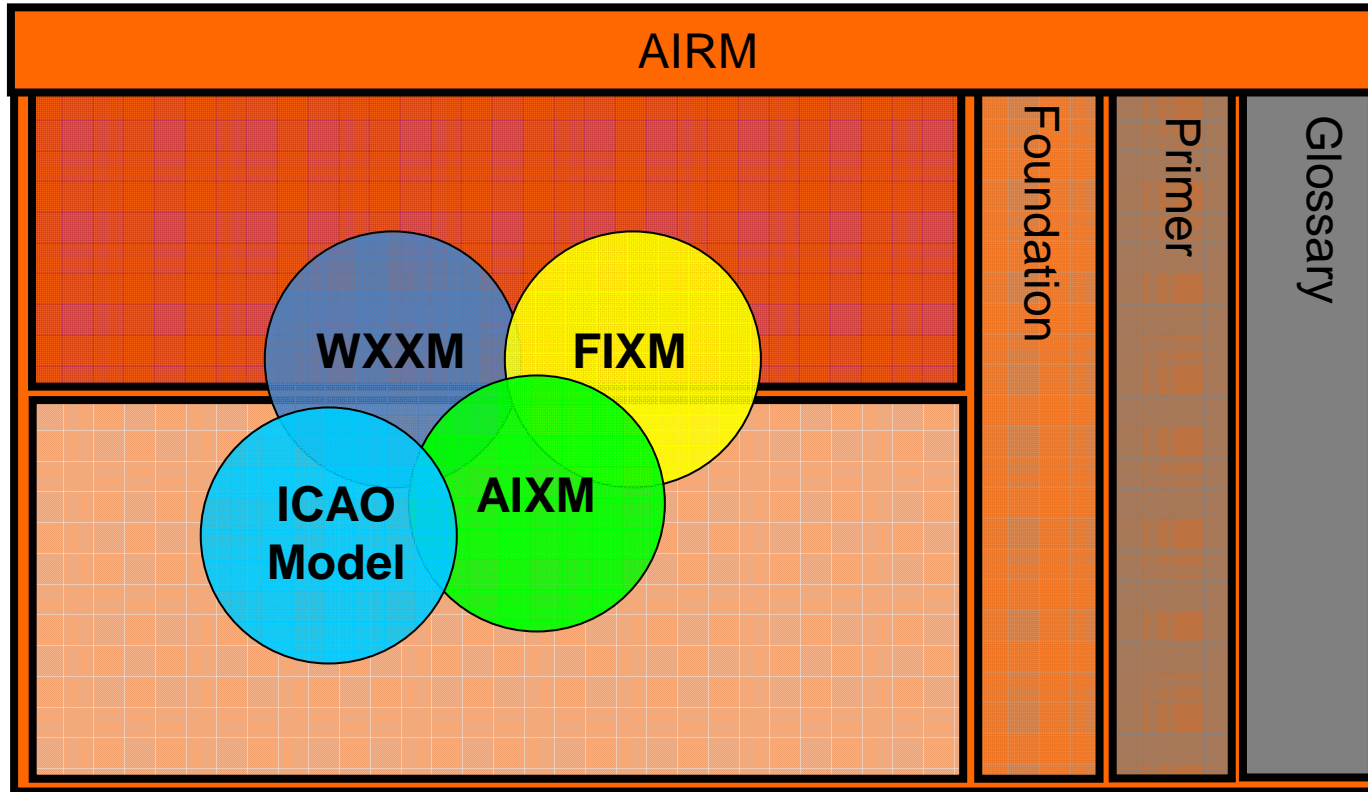

- From now:
 - WMO Model covers the core meteorological information constructs required for aeronautical meteorological information exchange and for other business domains
 - ICAO covers the specific exchange requirements for a selected set of ICAO Annex 3 services using the ISO/OGC/W3C foundation and WMO Model
 - WXXM v2 = WXXM v1 minus ICAO Model plus adding WMO model to its foundation

The essence explained

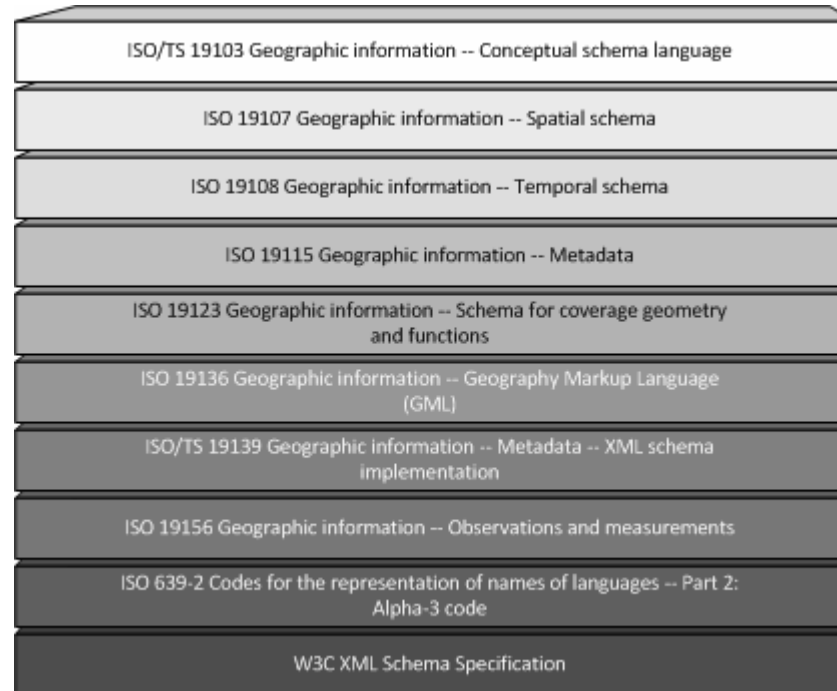

Air Transportation Information Exchange Conference - (featuring AIXM, WXXM and FIXM)

Foundation

Air Transportation Information Exchange Conference - (featuring AIXM, WXXM and FIXM)

Federal Aviation Administration

WMO Model

- WMO Model covers the core meteorological information constructs required for aeronautical meteorological information exchange and for other business domains
- From WXXM perspective:
 - Almost all (generic) MET under the <wx> namespace will be replaced by the WMO Model
- Full brief on WMO METCE: Day 2 - WXXM break-out session

ICAO Model

Air Transportation Information
Exchange Conference - (featuring
AIXM, WXXM and FIXM)

Federal Aviation
Administration

ICAO Model

Air Transportation Information
Exchange Conference - (featuring
AIXM, WXXM and FIXM)

- ICAO covers the specific exchange requirements for a selected set of ICAO Annex 3 code representations using the ISO/OGC/W3C foundation and WMO Model
- The ICAO Model released for applicability in November 2013 includes exclusively some Traditional Alphanumeric Code representations of MET information

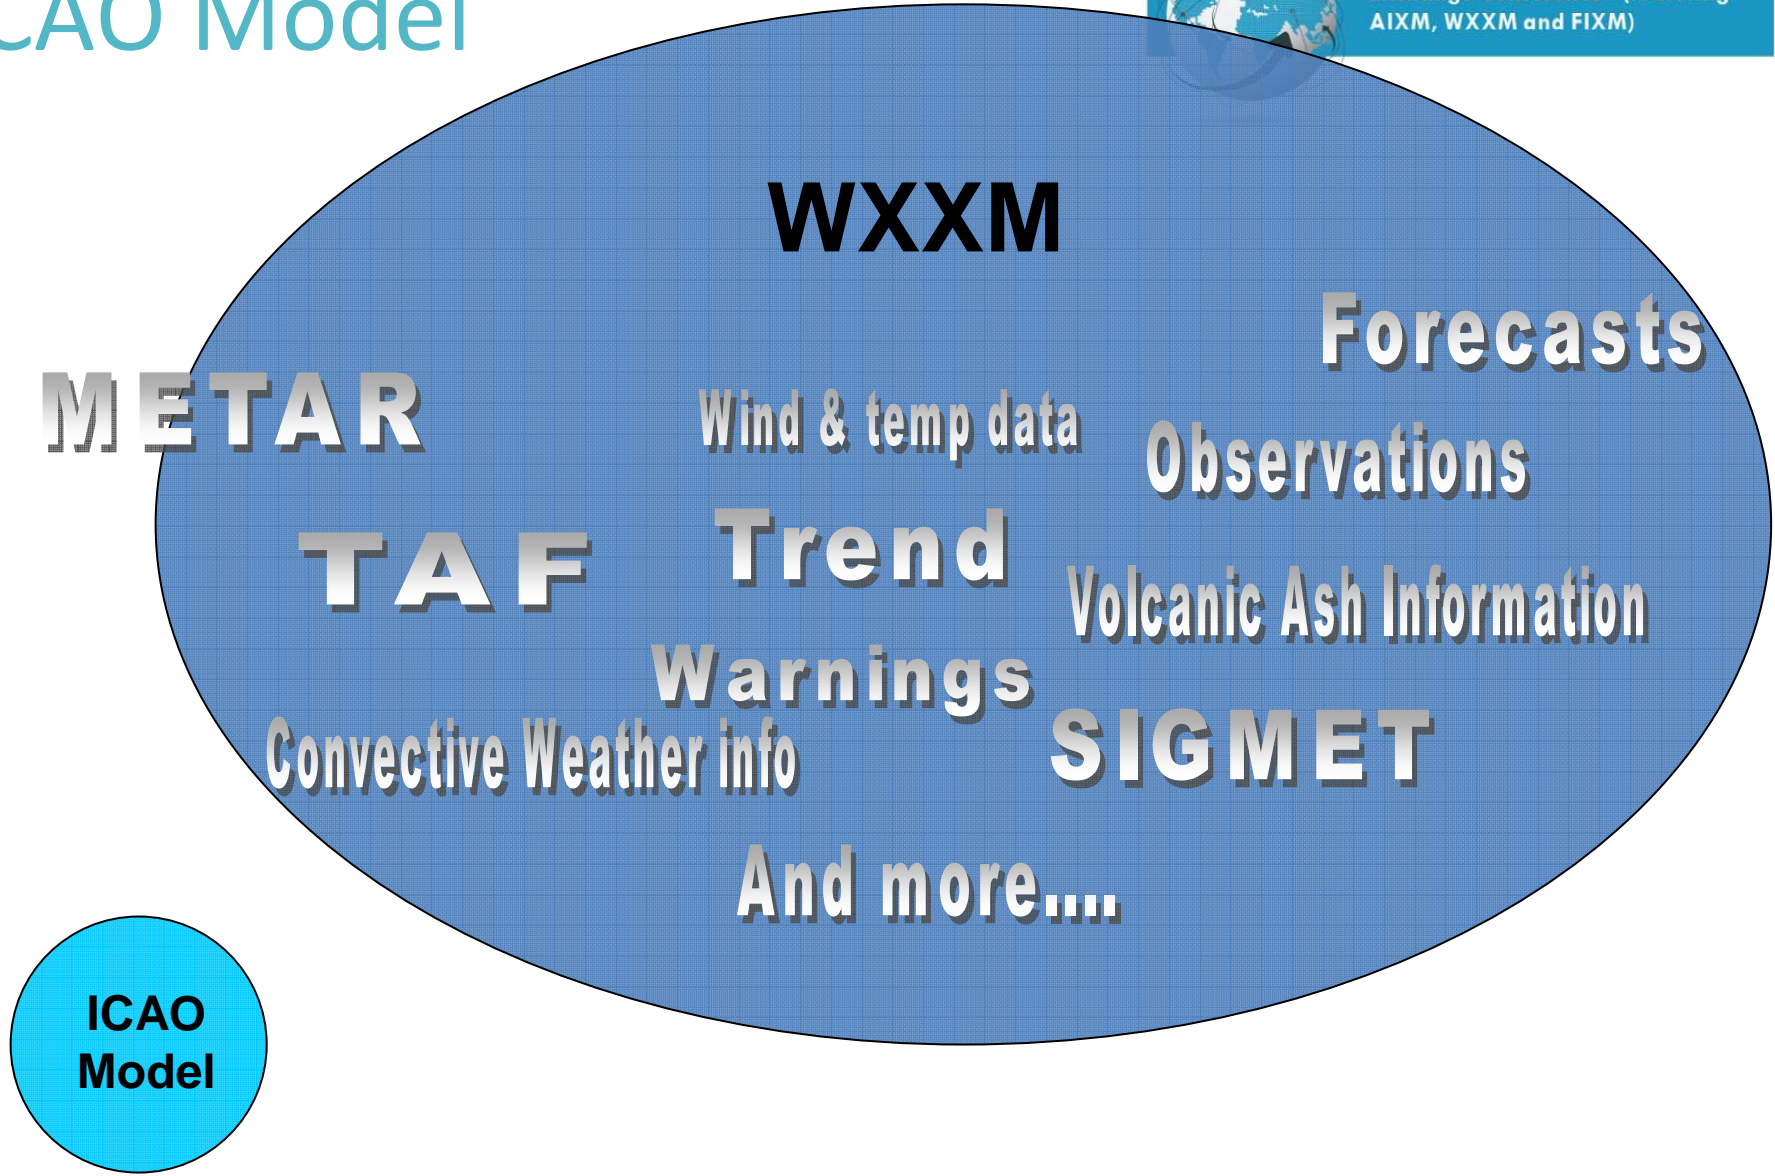

Federal Aviation
Administration

ICAO Model

Air Transportation Information Exchange Conference - (featuring AIMX, WXXM and FIXM)

ICAO Model

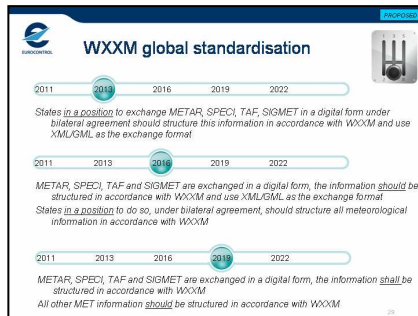

Federal Aviation Administration

ICAO Model, background

Air Transportation Information Exchange Conference - (featuring AIXM, WXXM and FIXM)

- Discussions between September '11 and February '12 on changes to ICAO Annex 3 provisions

WXXM global standardisation

States in a position to exchange METAR, SPECI, TAF, SIGMET in a digital form under bilateral agreement should structure this information in accordance with WXXM and use XML/GML as the exchange format

METAR, SPECI, TAF and SIGMET are exchanged in a digital form, the information should be structured in accordance with WXXM and use XML/GML as the exchange format

States in a position to do so, under bilateral agreement, should structure all meteorological information in accordance with WXXM

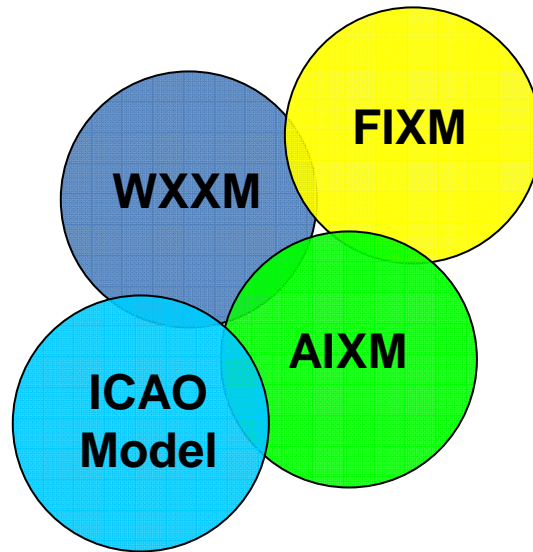

METAR, SPECI, TAF and SIGMET are exchanged in a digital form, the information shall be structured in accordance with WXXM

All other MET information should be structured in accordance with WXXM

WXXM v2

Air Transportation Information Exchange Conference - (featuring AIXM, WXXM and FIXM)

Federal Aviation Administration

WXXM v2, challenges

Air Transportation Information
Exchange Conference - (featuring
AIXM, WXXM and FIXM)

- Directly ahead:
 - Re-design to incorporate ‘new’ foundation element (WMO METCE)
 - Re-design to incorporate updated ISO/OGC standards (e.g. O&M 2)
 - Re-design to exclude elements covered by ICAO Model
- More identified

Federal Aviation
Administration

WXXM v2, more challenges

Air Transportation Information
Exchange Conference - (featuring
AIXM, WXXM and FIXM)

- Move away from a product-centric environment
 - Data-centric needs to support 4D trajectories

- Add, change and remove from the baseline WXXM
 - ICAO products represented by ICAO Model

WXXM v2, more challenges, or the real challenge

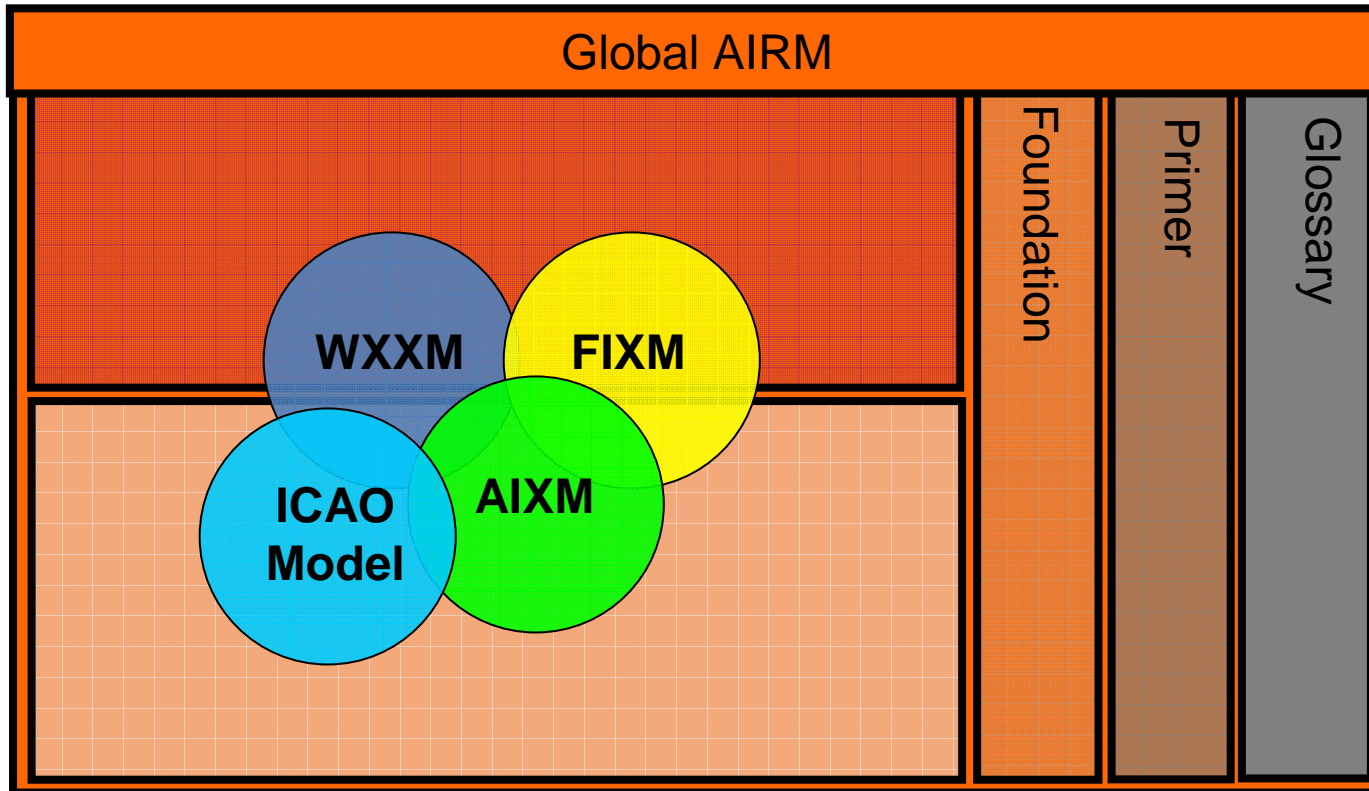

Air Transportation Information
Exchange Conference - (featuring
AIXM, WXXM and FIXM)

- Global Information Management Framework
 - Resolved MET semantic interoperability, but....
 - Is this always interoperable with other domains, standards and guidance?
 - Is ‘the MET high level deal’ the correct sort of deal?
 - Are the observed differences of approach in ‘regulatory’ approach harmful to global interoperability
- We need a global Air Transport reference

WXXM v2, more challenges

Air Transportation Information Exchange Conference - (featuring AIXM, WXXM and FIXM)

Federal Aviation Administration

Timelines

- ICAO Model RC1 & WMO METCE RC1: October 2012
- ICAO Model RC2 & WMO METCE RC2: February 2013
- ICAO Model & WMO METCE released: July 2013
- WXXM v2: Spring 2013
- WXXM v2.x: from September 2013
- WXXM v3 (global interoperability framework):

- Tomorrow:

Everything explained better 😊 ; ATIEC WXXM break-out session

Federal Aviation
Administration

...remember from this

Air Transportation Information
Exchange Conference - (featuring
AIXM, WXXM and FIXM)

- Focused investment over last 12 months on global MET interoperability aspects
 - WXXM-, ICAO- and WMO-communities working together
 - ICAO & WMO components nearly finished
 - WXXM v2 Spring 2013
- Aviation MET semantic interoperability almost resolved
- Now to fit it into a global air transport information framework
