

Global Harmonization Through Collaboration

An Enterprise Architecture Approach

AIR TRANSPORTATION INFORMATION EXCHANGE CONFERENCE - (FEATURING AIXM, WXXM AND FIXM)

August 28, 2012 - August 31, 2012
NOAA Auditorium and Science Center
Silver Spring, Maryland

The heart of SWIM: achieving ATM Interoperability

An Enterprise Architecture provides the key components and a governance structure to help achieve this goal.

Organisation A

Organisation B

Real World System

Organisational Alignment

Process Alignment

Semantic Alignment

Syntax (XML,...)

Interaction (SOAP, REST, OGC...)

Transport (HTTP, TCP/IP,...)

What is an Enterprise Architecture?

Air Transportation Information
Exchange Conference - (featuring
AIXM, WXXM and FIXM)

- An Enterprise is a collection of organisations that share a common set of goals

- An Architecture is the fundamental of organising:
 - Components,
 - their Relationships,
 - Principles governing their Design and Evolution.

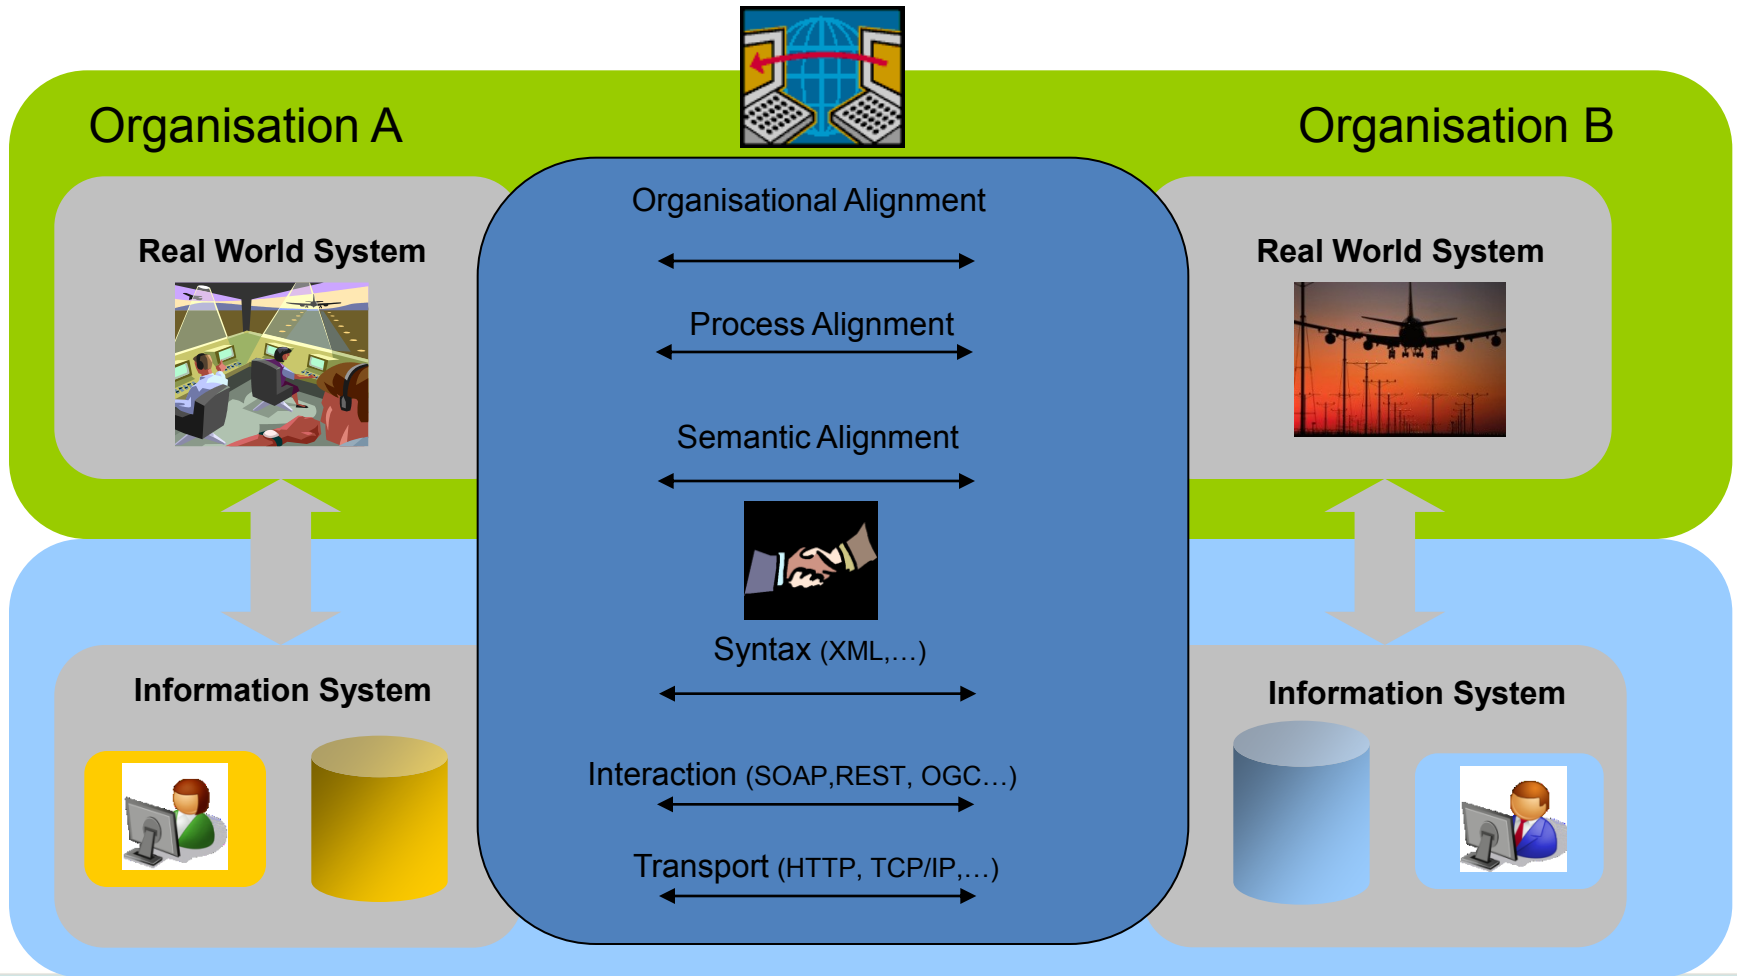

Achieving ATM Interoperability

How does the EAEA actually help?

Achieving ATM Interoperability

How does the EAEA actually help?

AIRM - There's a lot in the name...

A T M I n f o r m a t i o n R e f e r e n c e M o d e l

'Now, no-one to my knowledge has ever accused AIRM of being "sexy" but it is crucial. It's vital for global interoperability...' David McMillan
(see <http://www.eurocontrol.int/articles/need-speed>)

AIRM Goals

Semantics

Semantics

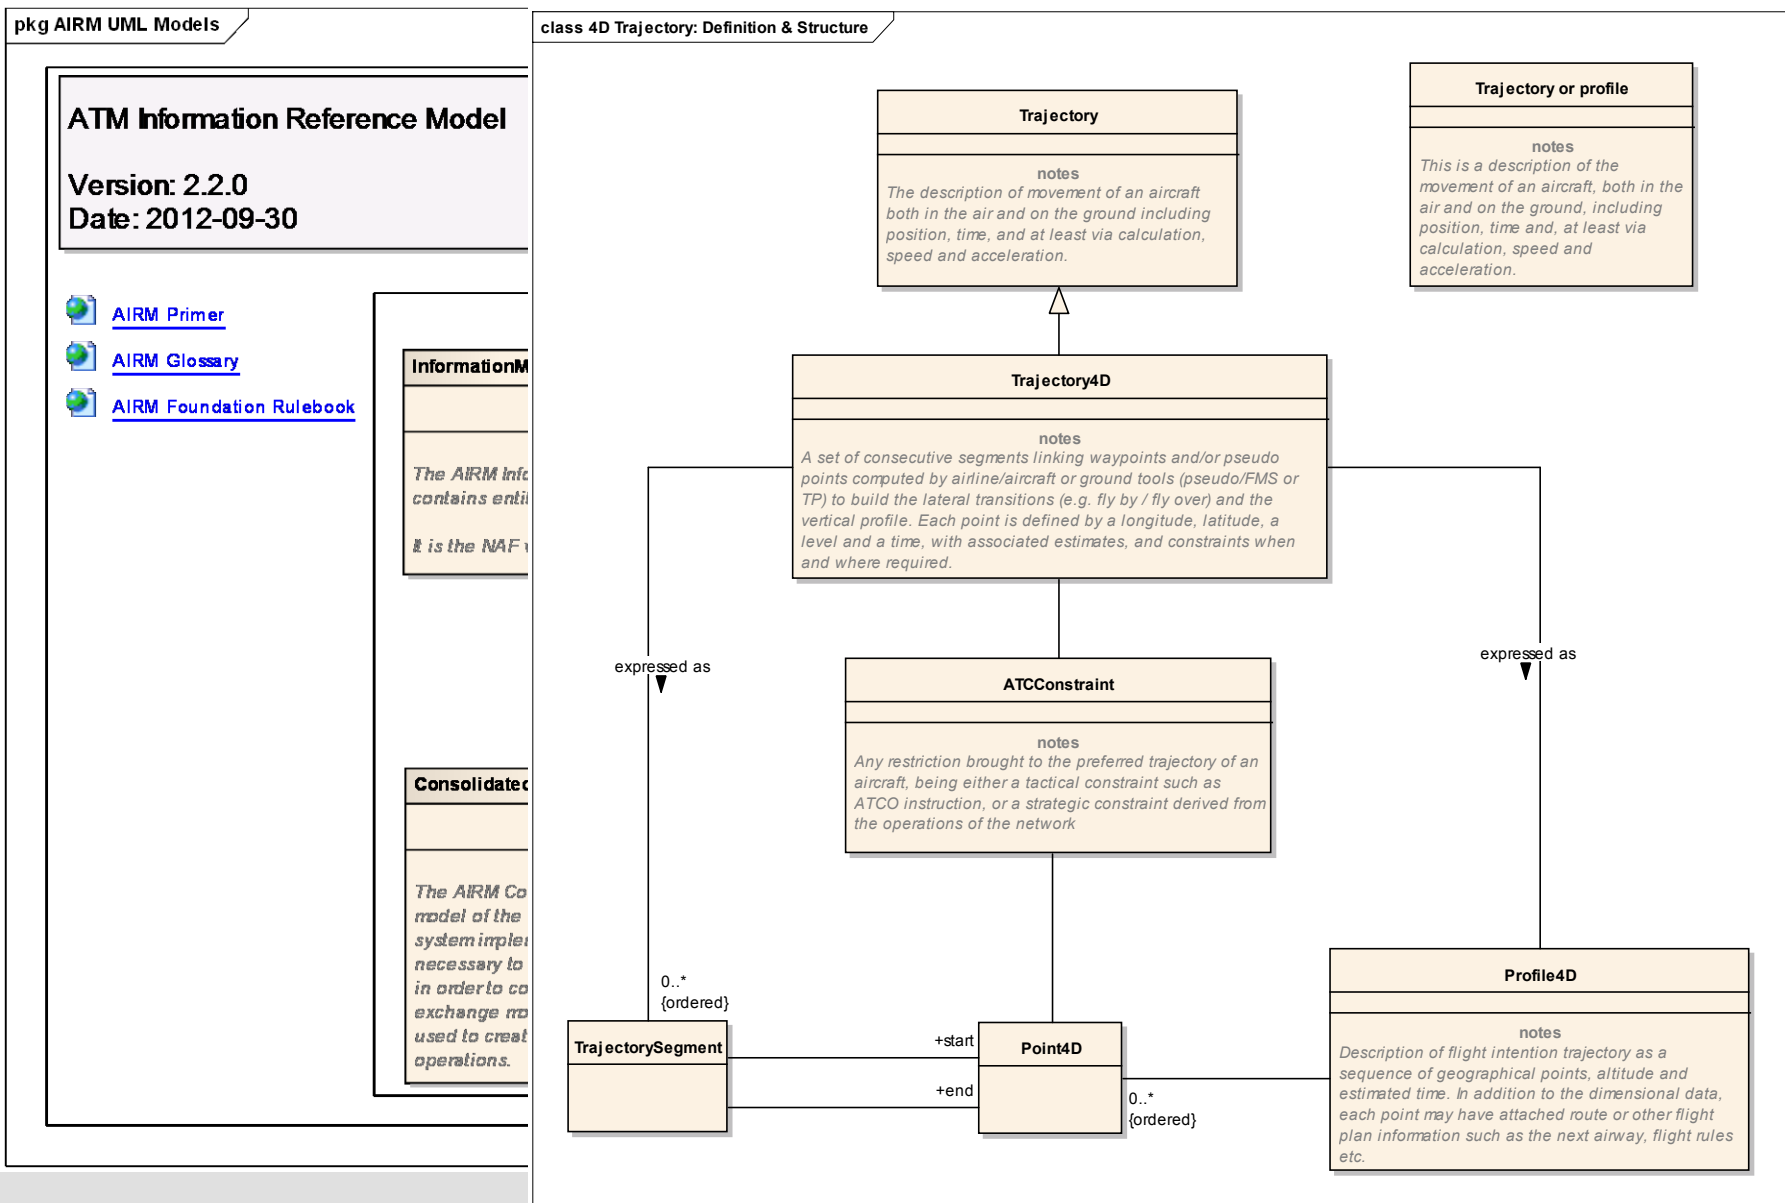

+ Promote ATM Information Standards,
European and Globally

Semantics

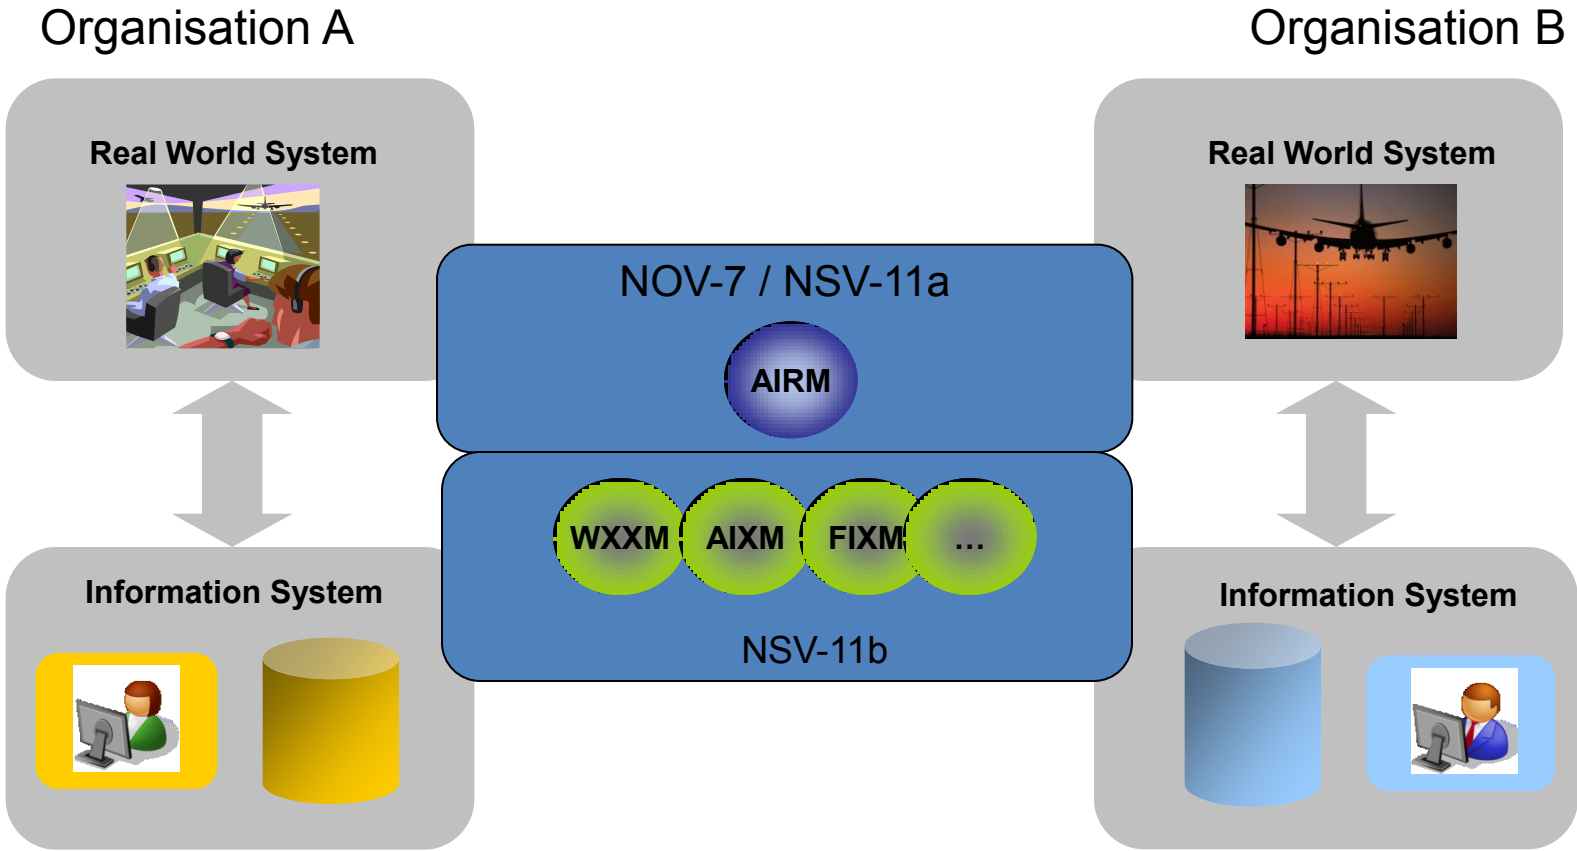

How does the AIRM look like?

Achieving ATM Interoperability

How does the EAEA actually help?

Adapting the AIRM to a Specific Use

NSV-11b

NOV-7 / NSV-11a (AIRM)

A defined area on land or water (including any buildings, installations and equipment) intended to be used either wholly or in part for the arrival, departure and surface movement of aircraft/helicopters.

ONE LOGIC, MULTIPLE SOLUTIONS !

Key Points

- **EAEA**
 - Provides key components and a governance structure to achieve ATM interoperability within SESAR
 - Acts as a management tool
- **AIRM**
 - Is a key component of the EAEA
 - Achieves ATM semantic interoperability
 - Standardises the operational language and provides a seamless reference data model for builders
- **AIXM, WXXM, FIXM**
 - Are key components of the EAEA
 - Define & specialize the AIS, Met and Flight information elements to be exchanged between systems
 - Remain semantically compliant with the AIRM
- **Within SWIM**
 - As a minimum, achieve semantic interoperability (AIRM compliance)
 - Achieve a better level of interoperability whenever possible, through common –XMs and shared service models
 - Solutions based on XMs, XM extensions, or newly defined payloads.

Towards a global Information Management Framework...

Air Transportation Information Exchange Conference - (featuring AIXM, WXXM and FIXM)

Note: Inspired by the EC European Interoperability Framework
