towards Digital ATM*

Ontologies use for Features Conflation

Presented By: Luis Bermudez

Date: Aug 28, 2013

Federal Aviation
Administration

Air Transportation Information Exchange Conference

(featuring AIXM, WXXM and FIXM)

August 27 - 29, 2013

NOAA Auditorium and Science Center
Silver Spring, MD

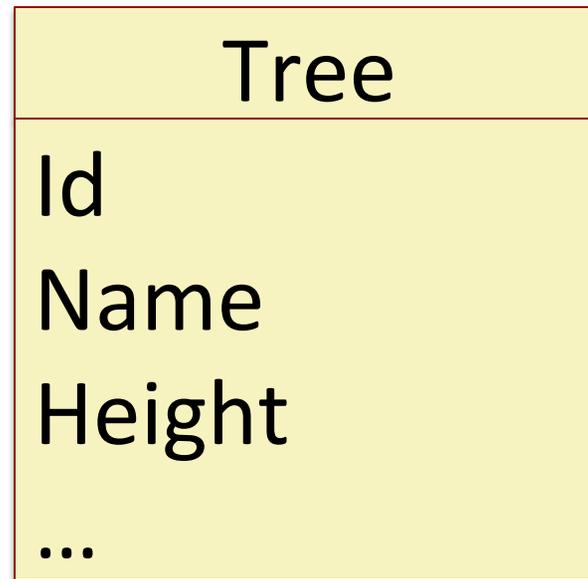

What are Features?

How Geeks talk about features?

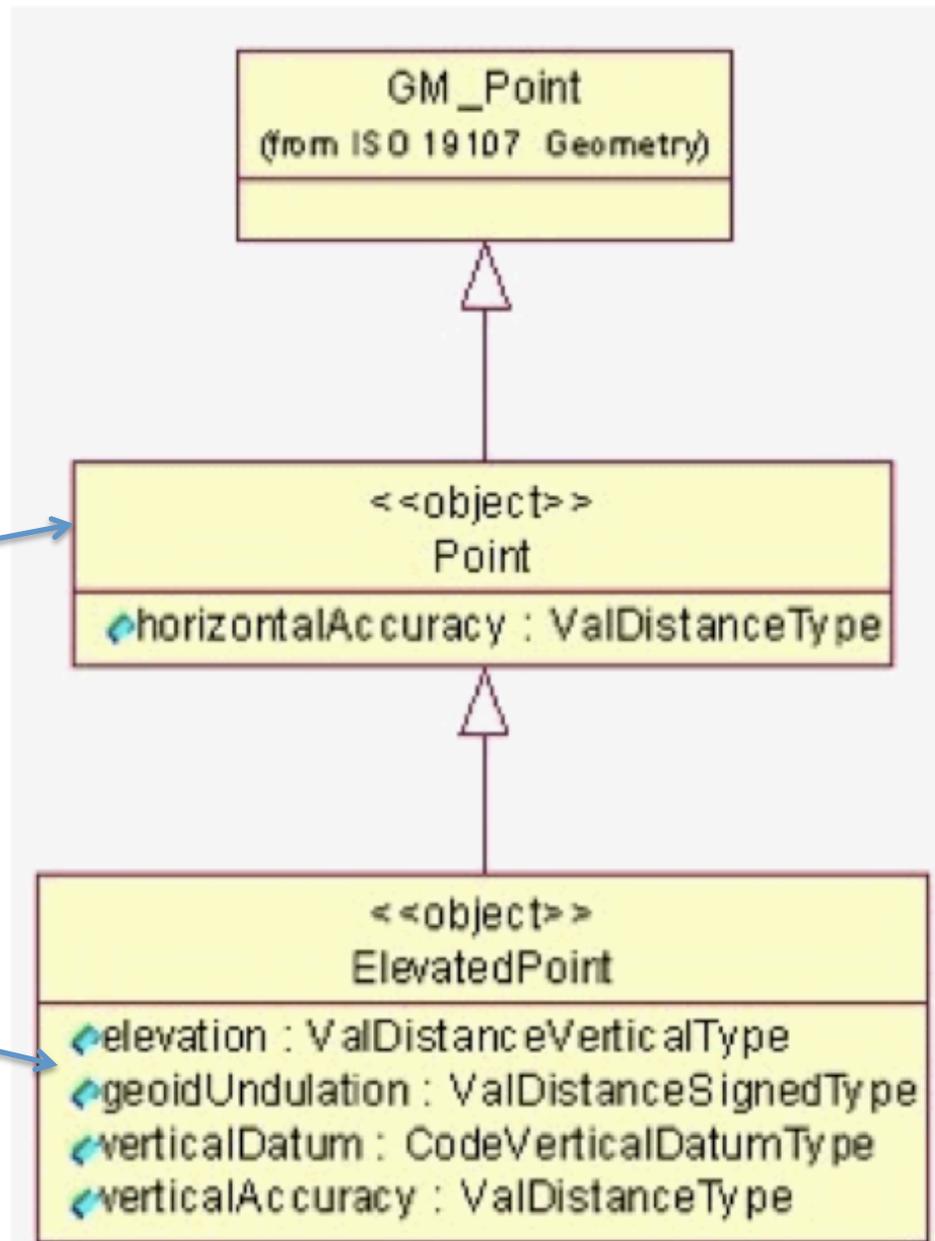

Conceptualize it
=
Create a model

Road

- Name: Rt 32
- Id: 0032

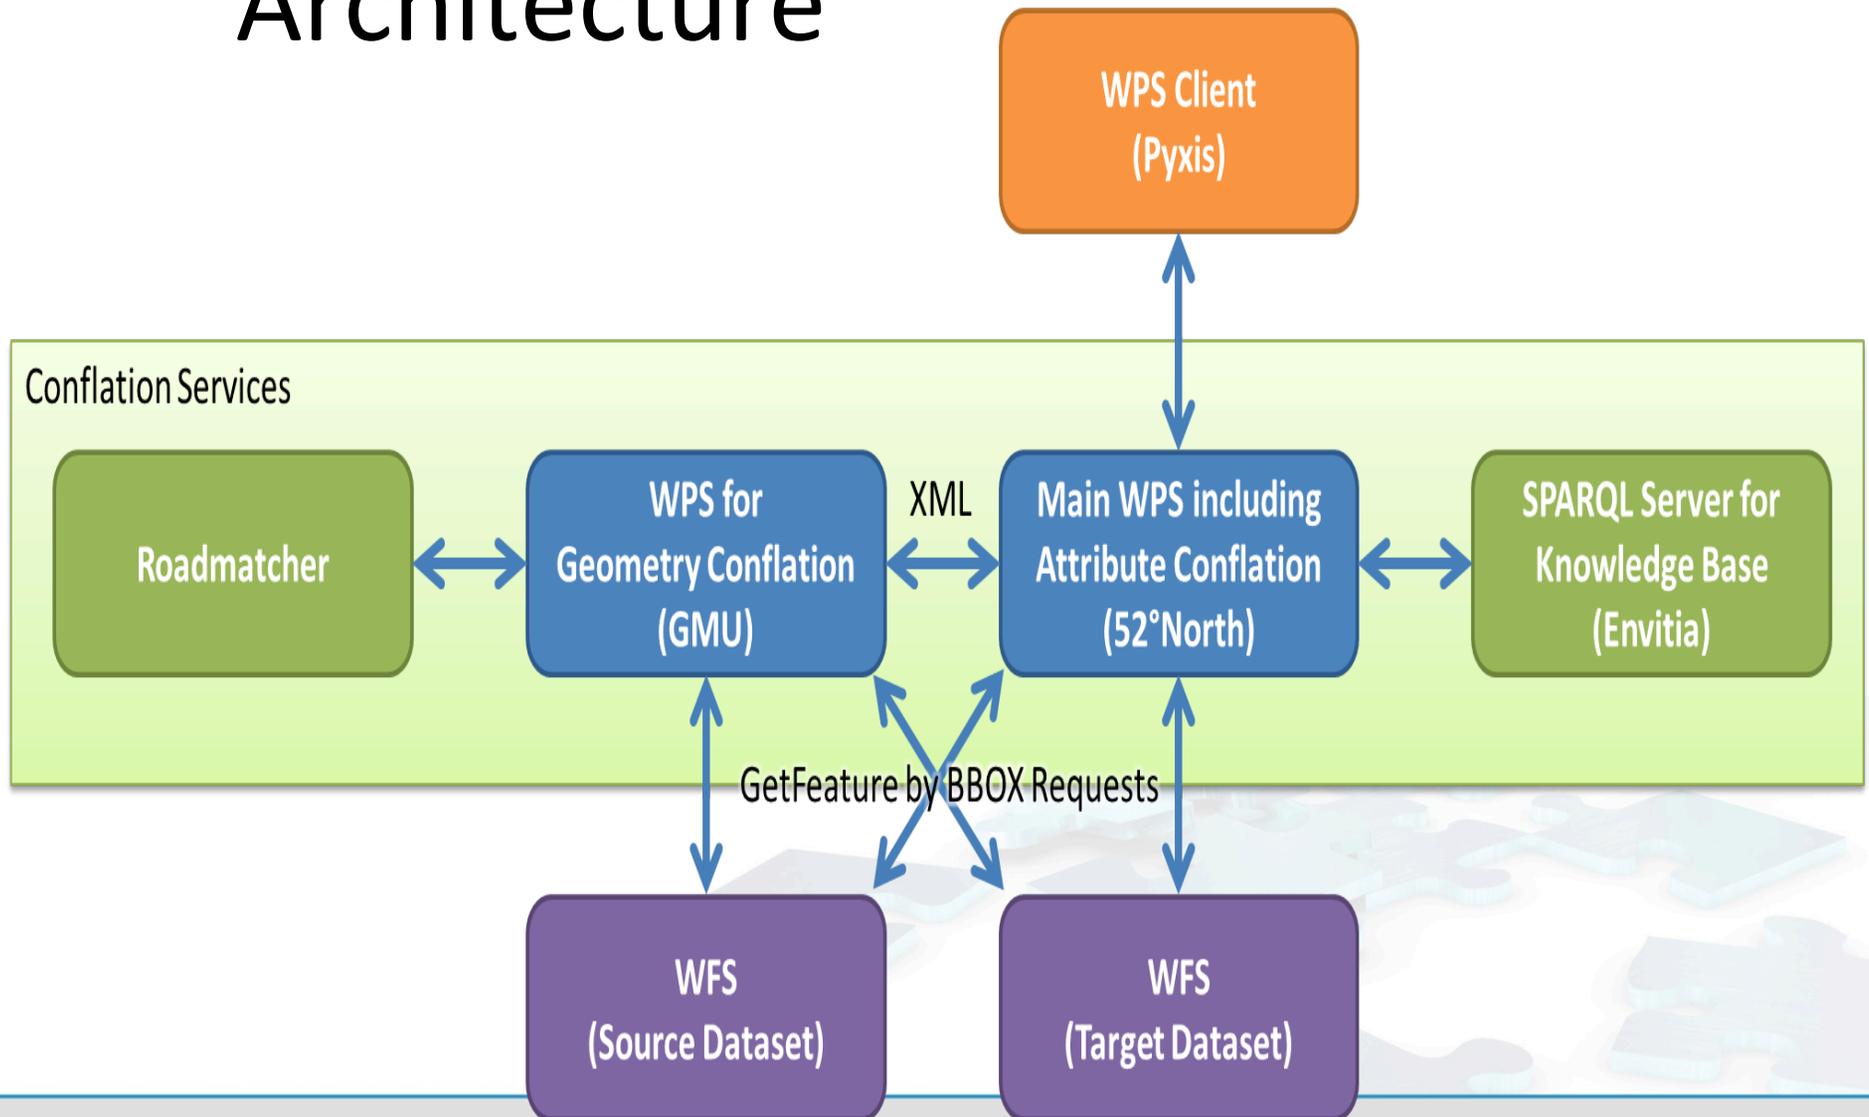

Street

- Label: Route 32
- Identifier: 0056
- width: 4m

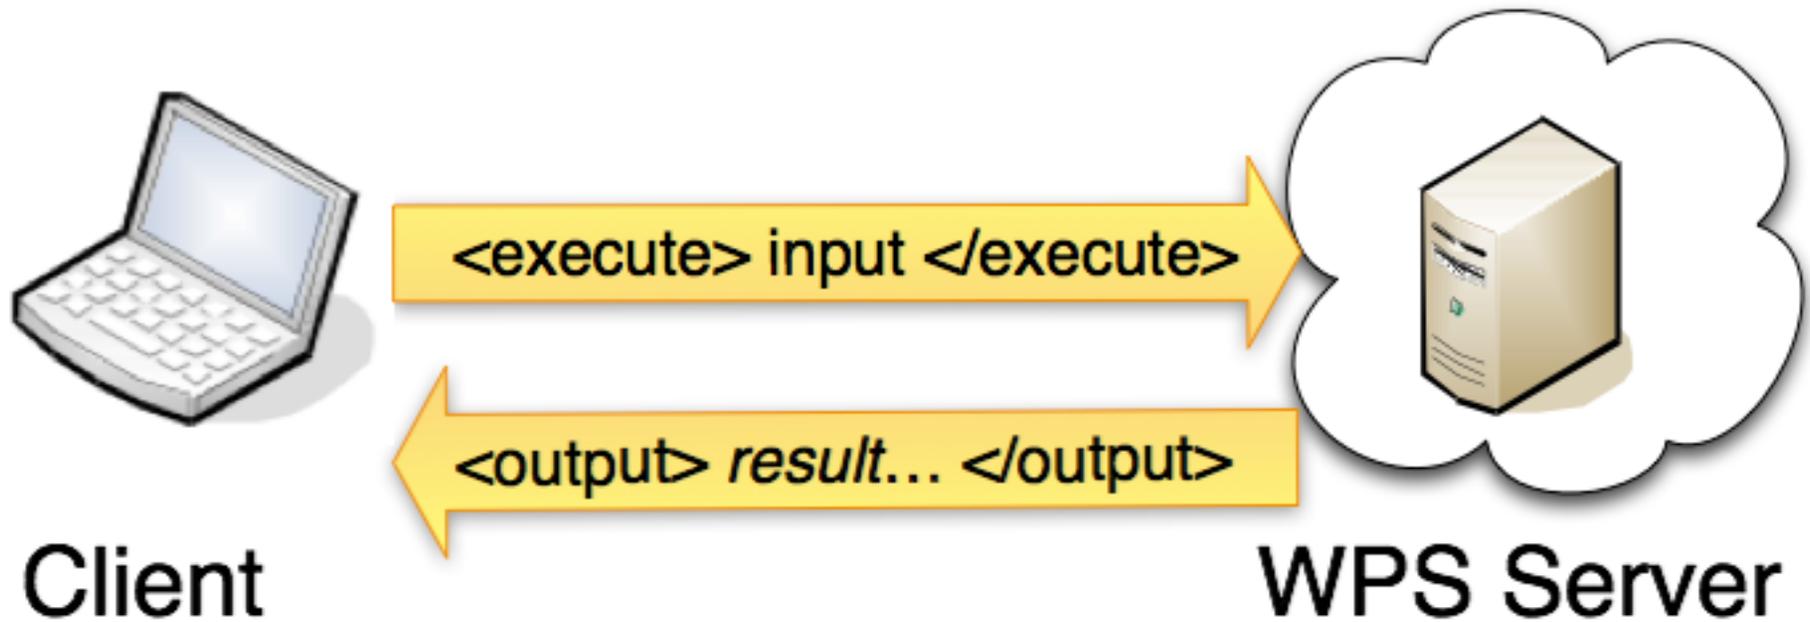

Conflation

Architecture

Web Processing Service (WPS)

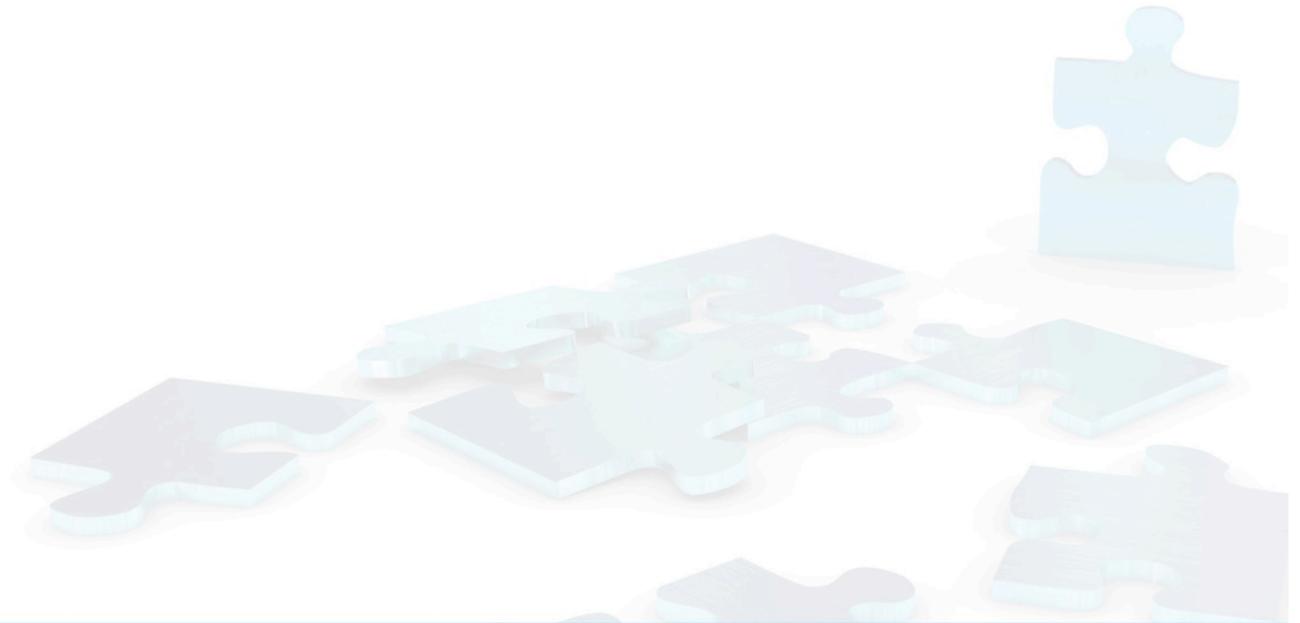

WPS Inputs

- **source-wfs** – a WFS GetFeature request providing the source dataset
- **target-wfs** – a WFS GetFeature request providing the target dataset
- **bbox** – an optional bounding box where the conflation should be applied

WPS Outputs

- wps:Output - “**result**” a link to the GML
- wps:Output - “**provenance**” a link to the GML with provenance
